Type of winding, No. of layers, Type of insulation and connections etc., the old winding wire should not be removed by burning which will damages the core. At no stage winding or any portion of the motor should be heated for removal of burnt windings, burnt wires have to be pulled out manually one by one without damaging the core. After removing the entire windings the slots have to be cleaned by a smooth file, nochemical or solvents to be used. If necessary, electrical heating or winding without affecting the core is permitted.
